

# GROUP 1

## PROJECT MARKS

Following are the results of your final project marking.

The project was tested in Android Studio with the following setup:

Android studio version: Ladybug feature drop 2024.2.2

Compile SDK: 35

Min SDK: 24

Target SDK: 35

Java Version: 11

Gradle plugin version: 8.8

Gradle version: 8.10.2

After cloning a fresh copy of your repository, features were tested in order that they appear in the "Done" column on your group's Trello board. Testing terminated when a feature that failed to pass the "happy path" was encountered.

Each feature was marked as follows:

zero (0)--Missing, or not graded due to earlier failures.

5 pts--Not really: present, but fails happy path.

6.5 pts--Somewhat: fails boundary values or devious input.

8 pts--Mostly: no failures, but not ready for Play Store.

9.5 pts--Definitely: no failures, could be published as-is on Play Store.

Extra features were considered only if all other features achieved "Mostly." Additionally, extra features only result in extra credit if they are marked "Mostly."

The "Done" list was meant to be ordered with the most important at the top (this would be the entry point to the app).

I used the order in your README.md file instead, which is a pity because some of the features are just stubs, so later features were not evaluated as per the grading procedure.

Overall this app has a nice design, but the functionality is not yet complete.

Section/+ Component		Mark	Score	Possible
<hr/>				
<b>Marks</b>				
+	Feature 1:	<b>Mostly</b>	8	of 10
Basic User Profile.				
Not sure why I'm allowed to change the name after registering.				

+	Feature 2:	<b>Somewhat</b>	6.5	of	10
	Simple Step Counter.				
	Not possible to set the goal to '0'; why? Also, the number of steps displayed at the top (4320) does not match the number of steps in the "Step History" panel (0 steps).				
+	Feature 3:	<b>Not really</b>	5	of	10
	Water Intake Tracker. None of the buttons seem to do anything beyond showing a "toast" about "demo mode."				
+	Feature 4:	<b>Somewhat</b>	6.5	of	10
	Sleep logger.				
	Does it really make sense to allow entries in the future?				
	Entering 10:00 PM for both "Bedtime" and "Wake up time" results in zero hours of sleep, which does not seem to be consistent with other instances where wake up time is also after noon.				
+	Feature 5:	<b>Somewhat</b>	6.5	of	10
	Mood tracker.				
	It wasn't clear that mood would be tracked by the minute. Also, moods entered in the future are not recorded: I should not be allowed to enter them if they are not going to be accepted.				
+	Feature 6:	<b>Somewhat</b>	6.5	of	10
	Basic Workout Logger.				
	Wouldn't it make sense to be able to enter workouts for previous days? Also, I should be able to enter the time of day the workout took place if this is going to be recorded.				
+	Feature 7:	<b>Somewhat</b>	6.5	of	10
	Simple Meal Tracker.				
	It's possible to enter meals in the future. Does this make sense?				
	Also, it's possible to enter zero (0) calories, which doesn't make sense.				
+	Feature 8:	<b>Mostly</b>	8	of	10
	Campus Gym Status.				
+	Feature 9:	<b>Mostly</b>	8	of	10
	Basic Meditation Timer.				
+	Feature 10:	<b>Not really</b>	5	of	10
	Simple Health Dashboard.				
	This is populated with fake data. Why?				

+	Feature 11:	Not graded	0	of	10
	Basic Goal Tracking.				
+	Not graded due to earlier failures.	Not graded	0	of	10
	Feature 12:				
	Data Export. Not graded due to earlier failures.				
	Marks net score:		66.5	of	120
	Total net score:		66.5	of	120 = 55%
